DETAILED ACTION

Application Status

- [1]** Claims 30-57 are pending in the application.
- [2]** Applicant's cancellation of claims 1-29 and addition of claims 30-57 in Paper No. 6, filed November 15, 2001, is acknowledged.
- [3]** It is noted that Paper No. 6 includes an amendment to the specification. However, the amendment to the specification has not been entered because the page and line numbers of the specification as stated in the amendment do not correspond to the page and line numbers of the instant specification.

Election/Restrictions

- [4]** Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I.** Claim(s) 30-45 and 47-57, drawn to a compound and a pharmaceutical composition comprising said compound, classified in class 514, subclass 375.
 - II.** Claim(s) 46, drawn to a method for producing a compound, classified in class 435, subclass 41.
- [5]** The inventions are distinct, each from the other because:
- [6]** The method of Group II and the compound of Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the compound of Group I can be made by chemical synthesis.
- [7]** MPEP § 803 sets forth two criteria for restricting between patentably distinct inventions – 1) the inventions must be independent or distinct and 2) there must be a serious burden on the examiner. MPEP § 803 states, "For purposes of the initial requirement, a serious burden on the examiner may be *prima facie* shown if the examiner shows by appropriate explanation either separate classification, separate

status in the art, or a different field of search as defined in MPEP § 808.02". Because the inventions of Groups I and II are distinct for the reasons given above, have separate classification, and each of the inventions requires a separate patent and non-patent literature and structure search, restriction for examination purposes is proper.

[8] Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

[9] Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
